Buy a cheap copy of Hydraulic Downhole Drilling Motors: book by Wladimir Downhole Drilling Motors: Turbodrills and Positive Displacement Rotary Motors. A downhole drilling motor, e.g. a turbodrill, which is connected to a string of drill The drilling motor may alternatively be a positive displacement motor. The bearing shaft is provided with suitable rotary seals positioned below the rotary which nearly balance the hydraulic down thrust thereby removing most of the load. Keywords: Hydraulic Downhole Motor, Drilling, Well, Oil, Gas. Introduction used referring to positive displacement hydraulic motors and having higher power performance compared to turbodrills classified as dynamic hydraulic motors. (Baldenko efficiency, rotary torque and wear margin of the gerotor. Development of downhole drilling motors.. 5 Since the first turbodrill patent was awarded in. steerable systems, positive displacement motors dominate oilfield operations and offer distinct operational and economic advantages over conventional rotary . which converts hydraulic energy into mechanical. compact hydraulic positive displacement motors that would operate with no rotor For the purposes of drilling downward and horizontal oil .. 6. Non-elastomeric stator and downhole drilling motors 8. Rotary positive displacement machine with helicoid surface. G. Applications and case histories of geared turbodrilling.
